

## Training and Exercises | Every second counts.

### BUILD LONG-TERM RESILIENCE

Using our powerful DisasterAWARE® platform, we simulate realistic hazard scenarios to help decision makers gain a deeper understanding of hazard impacts on communities and to exercise preparedness plans in advance of real-world events. PDC's exercise programs help test complex networks of organizations and response activities, making sure stakeholders respond effectively under high-pressure, ever-changing circumstances. Our experts can support any type of hazard scenario, from tabletop activities to full-scale, multinational exercises involving numerous agencies.

### WORK WITH LEADING EXPERTS

Pacific Disaster Center (PDC) works with some of the most critical humanitarian assistance and disaster relief agencies worldwide. We've assisted local, state, national, and international agencies for more than two decades to enhance preparedness. Our stakeholders include governmental and non-governmental organizations such as the U.S. Department of Defense, U.S. Coast Guard, FEMA, the United Nations, Red Cross, USAID, universities, and international disaster management and military agencies responsible for humanitarian relief.

### SAVE LIVES, REDUCE LOSSES

- + Leverage the largest collection of scientifically-verified data and predictive modeling tools to anticipate losses, needs, and to plan effectively.
- + Test procedures and systems and coordinate response agencies ahead of a disaster.
- + Use historical hazard data and risk and vulnerability information to design realistic exercise scenarios.
- + Incorporate lessons learned into future plans and exercises.

## OUR SERVICES INCLUDE

Scenario development, design, and execution

Event scripting and design

Disaster preparedness training

DisasterAWARE technology and training

Subject matter expertise and best practices

Data integration, mapping, modeling

## Featured EXERCISE: FA-HUM

PDC participates in the planning and execution of an annual exercise sponsored by U.S. Southern Command (USSOUTHCOM) and U.S. Army South (ARSOUTH), Fuerzas Aliadas Humanitarias (FA-HUM). FA-HUM brings together Central American nations along with their Caribbean and North and South American partners to strengthen regional collaboration by integrating various military, governmental, and nongovernmental stakeholders to simulate response to a major disaster.

### EXERCISE OPTIONS

**Scenario-based Training**

**Tabletop Exercises**

**Functional Exercises**

**Full-scale Exercises**

# 100+

Trainings and Exercises with global partners in 2017

- FA-HUM Multi-national Volcano Exercise**  
Guatemala
- Makani Pahili Statewide Hurricane Exercise**  
Hawaii
- NATO Coalition Interoperability Exercise**  
Poland
- Pacific Resilience Earthquake and Tsunami Exercise**  
Fiji
- Lower Mekong Initiative Disaster Response Exercise**  
Vietnam
