Better solutions. Fewer disasters. Safer world.

Honduras National Disaster Preparedness Baseline Assessment Department Profile

Department: Francisco Morazán

Department Capital: Tegucigalpa

Area: 8,619 km²

Francisco Morazán is located in central Honduras. The department capital of Tegucigalpa is also the national capital and home to the central government. Tegucigalpa is Honduras' largest and most populous city as well as the nation's political and administrative center.

Case Study: Tegucigalpa CODEM

The Tegucigalpa CODEM maintains an emergency communications center staffed 24/7, has a designated Emergency Operations Center, and stores relief supplies on site. The CODEM supports 160 local emergency-management committees or CODELs, which are comprised of 11 volunteers who are trained to respond during emergencies. The CODELs are provided with basic tools and uniforms and participate in training at COPECO. Tegucigalpa also maintains the Sistema de Información Municipal sobre Riesgos y Estudios Territoriales (SIMRET), an information system being designed to serve as a central repository for risk-management information among numerous agencies within Tegucigalpa.

 $^{^{}m 1}$ Multi-Hazard Exposure: Average exposure of the population to hazards.

² Ambient Population: 24-hour average estimate of the population in each department. Ambient population typically differs from census population.

NDPBA Honduras Report: Department Profile

Vulnerability (V)

Vulnerability³ Rank: 16 of 18 Departments (Score: 0.298). Despite having very low vulnerability overall, Francisco Morazán ranks 4th in Environmental Stress. The bar chart on the right indicates the socioeconomic themes contributing to the department's overall Vulnerability score.

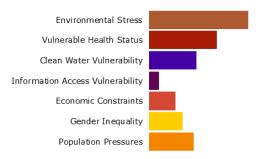

Table 3. Component scores for each vulnerability subcomponent

M	Environmental Stress	30.8% Forest Loss Due to Pine Beetle Plague	30.2% Water Shortage Area					
(2)	Vulnerable Health Status	16.1 Infant Mortality Rate	206.9 Maternal Mortality Ratio	77.1 Life Expectancy (years)	1.5% Acute Malnutrition Rate	2.4% Population Disabled	0.590 Communicable Disease Sub- Index ⁴	0.491 Non- Communicable Disease Sub- Index ⁴

	Population Pressures	2.3% Average Annual Population Change	3.2% Average Annual Urban Population Change					

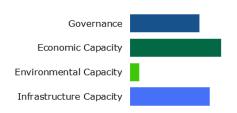

³ Vulnerability: The socioeconomic conditions that are associated with the susceptibility to disruptions in a country's normal functions.

⁴ Sub-indices: A combination of scaled indicators to represent a vulnerability theme (e.g. Communicable Disease). Values range from 0 (low) to 1 (high).

NDPBA Honduras Report: Department Profile

Coping Capacity (CC)

Coping Capacity⁵ Rank: 3 of 18 Departments (Score: 0.670) Francisco Morazán exhibits weaker Coping Capacity in the areas of Environmental Capacity and Transportation Infrastructure. The bar chart on the right indicates the socioeconomic themes contributing to the department's overall Coping Capacity score.

	Governance	65.5 Homicides per 100k Persons	373.4 Sexual Violence and Assault per 100k Persons	38.5% Households with Public Garbage Collection	67.1% Voter Participation (2013 Election)

⁵ Coping Capacity: The systems, means, and abilities of a country to absorb and respond to events that could potentially disrupt normal function.

Lack of Resilience (LR)

Lack of Resilience⁶ Rank: 17 of 18 Departments (Score: 0.314)

Francisco Morazán's Lack of Resilience score and ranking are due to very low Vulnerability combined with very high Coping Capacity scores.

Table 5. The three thematic areas with the weakest relative scores.

Environmental Capacity

Multi-Hazard Risk (MHR)

Multi-Hazard Risk⁷ Rank: 11 of 18 Departments (Score: 0.458)

Though Francisco Morazán exhibits a very high Multi-Hazard Exposure score, it is combined with very low Vulnerability and very high Coping Capacity scores, equating to low relative risk overall.

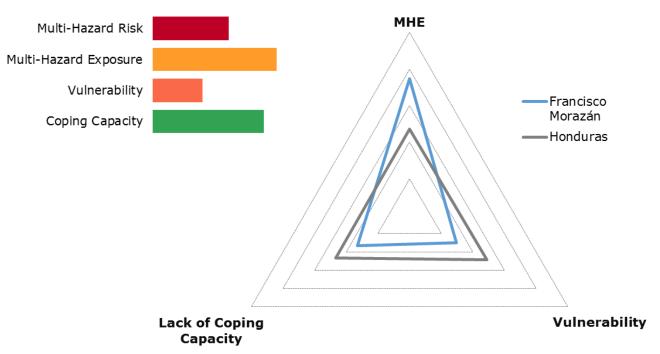

Figure 52. Department multi-hazard risk component scores compared to overall average country scores.

⁶ Lack of Resilience: The susceptibility to impact from the short-term inability to absorb, respond to, and recover from disruptions to a country's normal function. This index provides a hazard-independent look at current socio-economic conditions.

Multi-Hazard Risk: The likelihood of losses or disruptions to a country's normal function due to interaction between multi-hazard exposure, socioeconomic vulnerability, and coping capacity.

NDPBA Honduras Report: Department Profile

Successes

Lowest gender inequality

Ranked 18 of 18 departments, low gender inequality indicates that vulnerable populations are more likely to have their needs met under 'normal' conditions and may be less susceptible during times of disaster.

Low economic constraints

Ranked 16 of 18 departments, low economic constraints indicate that Francisco Morazán may be able to invest in additional mitigation and preparedness measures at the local and community level.

High overall infrastructure capacity

Ranked 2 of 18 departments, well-developed infrastructure – communication, health care, transportation - facilitates the exchange of information and physical distribution of goods and services to the population.

Recommendations

Institutionalize multi-hazard planning and education

Multi-Hazard Risk in Francisco Morazán is driven primarily by exposure. Develop a departmental multi-hazard mitigation plan to acknowledge exposure to multiple hazards. Engage the public in this process to promote an understanding of multi-hazard risk.

Increase environmental programs

Invest in programs to provide protection for the environment, including protected lands and reforestation projects, to increase the ability of the environment to recover after a disaster.

Invest in infrastructure

Invest in Transportation and Communication Infrastructures to increase coping capacity and resiliency within the department.

Better solutions. Fewer disasters. Safer world.
