# ENTRE RÍOS RECOMMENDATIONS

1

---

## Gender Inequality

Focus efforts to support equal labor participation by diversifying economic opportunities for women in the Province.

Promote social benefit programs that support single parents with children.

Encourage women to participate in the disaster management planning and decision-making process through inclusion community emergency brigades and representation in local government.

2

---

## Environmental Stress

Focus on protecting environmental resources from degradation, and deforestation. These environmental stresses increase the likelihood of hazard events and have wider implications for negative impacts on health and livelihoods, decreasing resilience.

---

## ENTRE RÍOS RECOMMENDATIONS

### 3

#### Communications Capacity

---

Entre Ríos ranks 9th in overall Communication Capacity. Forty percent of households have access to the internet, and just 15 television subscriptions per 100 people. Pursue public-private partnerships to increase availability and affordability of internet and television communications.

While investing to diversify access to communication technology, officials should broadcast critical information and disaster warnings primarily via alternate media (such as radio) to keep the population informed and ensure that appropriate actions are taken. Entre Ríos Province is exposed to drought, extreme temperature, wildfire, flood and landslide hazards.

### 4

#### Governance

---

Entre Ríos Province had the 4th lowest voter participation rate during the 2019 election (77%). Focus on building civic participation at the community to increase public voice and accountability, building trust in government.
