

Tsunami Travel-time Map Enhancements

Released 6/16/2020

SAMPLE TSUNAMI TRAVEL-TIME MAP PRODUCT

Tsunami travel-time map products have been enhanced in DisasterAWARE. Maps now include DART Buoys for Deep-ocean Assessment and Reporting of Tsunamis.

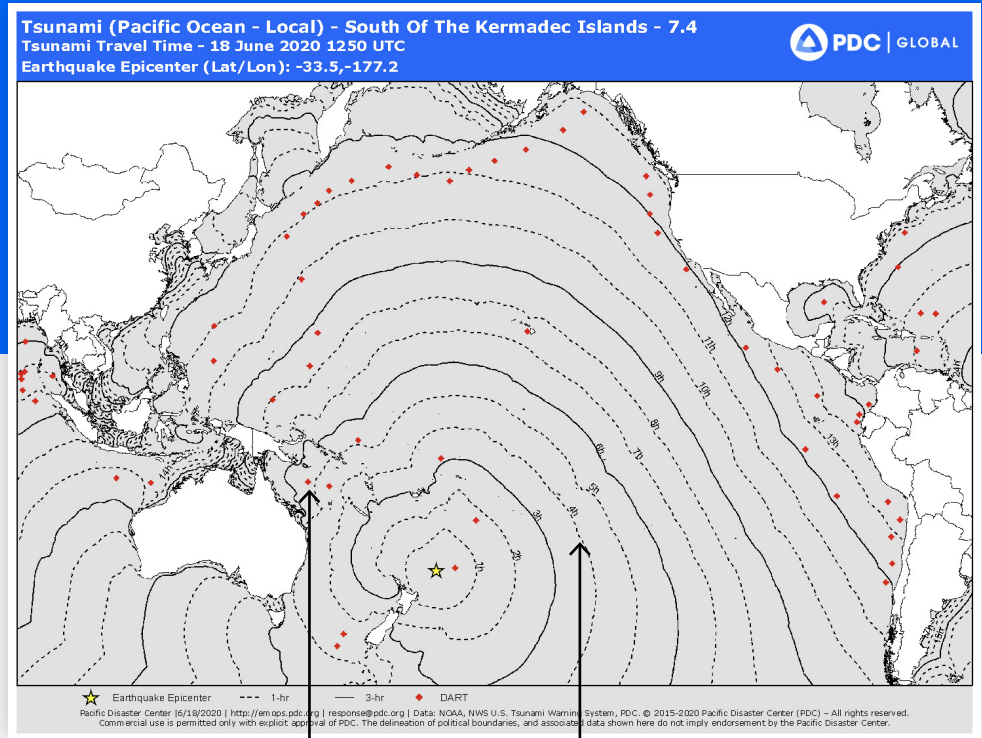

In addition, contour lines that depict tsunami travel times have been enhanced for greater clarity.

Global Coverage

6 BASINS, REAL-TIME

Real-time tsunami hazard notification and automated map products for:

- Pacific Ocean
- Alaska
- Hawaii
- Atlantic
- Eastern Atlantic
- Caribbean

DART buoys

Improved contours

COVERAGE FOR MANUALLY-PROCESSED HAZARDS

Real-time tsunami hazard data is not available for all locations. However, hazard information is entered manually and tsunami travel-time map products are automatically generated once a hazard is created for the following areas:

- The Indian Ocean
- Indonesia

ABOUT DISASTERAWARE

DisasterAWARE is an industry-leading disaster risk intelligence platform that provides early warning and decision support for thousands of governmental and nongovernmental organizations around the world. It's also offered to the business community for enterprise disaster risk management.
