**NDPBA DEPARTMENT PROFILE**

# COLOMBIA

## DEPARTMENT: CAQUETÁ

The Caquetá Department Profile provides a comprehensive summary of all municipal assessment findings.

### RISK AND VULNERABILITY

#### AVERAGE MUNICIPAL INDEX SCORES

#### MULTI-HAZARD RISK (MHR)

**Moderate**

Average Score: 0.476 • Rank: 17/33

#### RESILIENCE (R)

**Low**

Average Score: 0.475 • Rank: 26/33

#### MULTI-HAZARD EXPOSURE (MHE)

**Very Low**

Average Score: 0.379 • Rank: 28/33

#### VULNERABILITY (V)

**High**

Average Score: 0.514 • Rank: 12/33

#### COPING CAPACITY (CC)

**Low**

Average Score: 0.465 • Rank: 27/33

#### DEPARTMENT HIGHLIGHTS

Population (2018 Census)

**359,602**

Multidimensional Poverty Rate (2023)

**17.2%**

Prevalence of Food Insecurity (2023)

**16.3%**

Infant Mortality Rate (per 1,000 live births) (2020)

**19.0**

Adult Illiteracy (2018)

**6.9%**

## MULTI-HAZARD EXPOSURE (MHE)

### AVERAGE MUNICIPAL INDEX SCORES

RANK: 28 / 33 DEPARTMENTS

AVERAGE SCORE: 0.379

### AVERAGE ESTIMATED EXPOSURE TO EACH HAZARD:

#### Sea Level Rise

**0%** (0)

Buildings Exposed: **0%**

Critical Infrastructure Exposed: **0%**

#### Extreme Heat

**9%** (50,159)

Buildings Exposed: **8%**

Critical Infrastructure Exposed: **31%**

#### Coastal Flood

**0%** (0)

Buildings Exposed: **0%**

Critical Infrastructure Exposed: **0%**

#### Wildfire

**21%** (110,550)

Buildings Exposed: **13%**

Critical Infrastructure Exposed: **20%**

#### Riverine Flood

**36%** (191,231)

Buildings Exposed: **49%**

Critical Infrastructure Exposed: **52%**

#### Volcano

**0%** (0)

Buildings Exposed: **0%**

Critical Infrastructure Exposed: **0%**

#### Landslide

**30%** (160,374)

Buildings Exposed: **28%**

Critical Infrastructure Exposed: **16%**

#### Tropical Cyclone Wind

**0%** (0)

Buildings Exposed: **0%**

Critical Infrastructure Exposed: **0%**

#### Earthquake

**80%** (426,120)

Buildings Exposed: **87%**

Critical Infrastructure Exposed: **68%**

#### Tsunami

**0%** (0)

Buildings Exposed: **0%**

Critical Infrastructure Exposed: **0%**

#### Erosion

**<1%** (685)

Buildings Exposed: **<1%**

Critical Infrastructure Exposed: **<1%**

NOTE: Population exposure values are estimated using PDC's All-hazard Impact Model (AIM). Values may differ from Census population.

**MULTI-HAZARD EXPOSURE (MHE)****RANK: 28 / 33 DEPARTMENTS****AVERAGE MUNICIPAL INDEX SCORES****AVERAGE SCORE: 0.379**

Combining exposures from all hazards, below is a summary of the top ranking municipalities within Caquetá with the highest Multi-Hazard Exposure. Multi-Hazard Exposure for all municipalities is available in DisasterAWARE.

**RANK: 13/33**  
DEPARTMENTS ASSESSED

## VULNERABILITY (V)

AVERAGE MUNICIPAL INDEX SCORES

RANK: 12 / 33 DEPARTMENTS ASSESSED

AVERAGE SCORE: 0.514

### KEY FACTORS INFLUENCING VULNERABILITY

#### Housing Vulnerability

Populations living in poorly constructed housing, or homes built prior to the enactment of modern building codes, are more susceptible to structural damage and losses due to hazard impacts. In addition, higher density living situations such as crowded households increase susceptibility to negative consequences resulting from hazard exposure.

#### Information Access Vulnerability

The ability to understand hazard and disaster-related information before, during, and after an event is central to acting on that information. If information channels and formats are limited, the groups and individuals exposed to information inclusive of mitigation options, preparedness measures, available resources, and impending hazard events, will likewise be limited. Information access enables the building and diversification of exposed populations' critical skill sets both before and after disasters strike.

**RANK: 20/33**  
DEPARTMENTS ASSESSED

#### Energy and Communications Capacity

**SCORE: 0.283**

**RANK: 27/33**  
DEPARTMENTS ASSESSED

## COPING CAPACITY (CC)

AVERAGE MUNICIPAL INDEX SCORES

RANK: 27 / 33 DEPARTMENTS ASSESSED  
AVERAGE SCORE: 0.465

### KEY FACTORS INFLUENCING COPING CAPACITY

#### Energy and Communications Capacity

Homes, businesses, industry, and government all rely on access to energy resources and communications for continuity of daily activities. Expanding, strengthening, and securing the energy network and increasing the availability of internet services will contribute to economic development, facilitate effective and coordinated communication, and increase the speed of recovery processes in the aftermath of a disaster.

#### Healthcare and Emergency Services Capacity

Establishing and maintaining a broad range of systems and resources, including skilled caregivers and dedicated facilities, to support emergency services and the treatment of injury and disease during non-disaster times, will greatly enhance the capacity for disaster management and response, and improve the ability of societies to address disaster-associated health and medical impacts.

5	El Paujíl	0.466

## RESILIENCE (R)

**RANK: 26 / 33 DEPARTMENTS ASSESSED**

**AVERAGE SCORE: 0.475**

The Resilience score and ranking represent a combination of High Vulnerability and Low Coping Capacity. Key drivers of Resilience across municipalities within Caquetá are summarized below. Detailed municipal-level results for the RVA are available in DisasterAWARE.

### KEY FACTORS INFLUENCING RESILIENCE

#### Energy and Communications Capacity

Homes, businesses, industry, and government all rely on access to energy resources and communications for continuity of daily activities. Expanding, strengthening, and securing the energy network and increasing the availability of internet services will contribute to economic development, facilitate effective and coordinated communication, and increase the speed of recovery processes in the aftermath of a disaster.

#### Housing Vulnerability

Populations living in poorly constructed housing, or homes built prior to the enactment of modern building codes, are more susceptible to structural damage and losses due to hazard impacts. In addition, higher density living situations such as crowded households increase susceptibility to negative consequences resulting from hazard exposure.

#### Information Access Vulnerability

The ability to understand hazard and disaster-related information before, during, and after an event is central to acting on that information. If information channels and formats are limited, the groups and individuals exposed to information inclusive of mitigation options, preparedness measures, available resources, and impending hazard events, will likewise be limited. Information access enables the building and diversification of exposed populations' critical skill sets both before and after disasters strike.

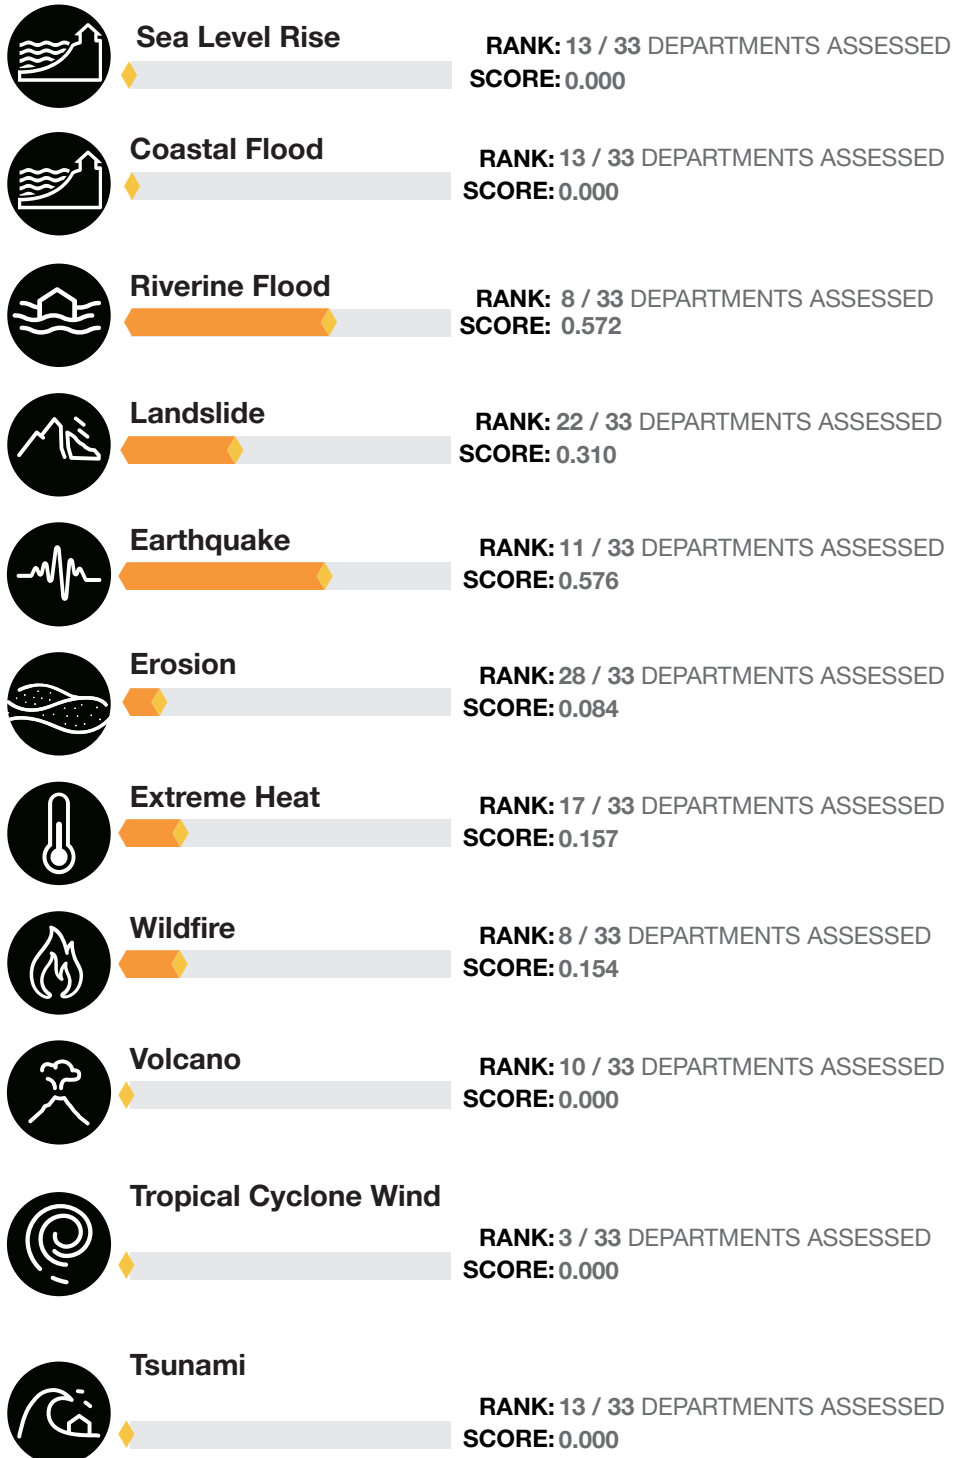

#### Healthcare and Emergency Services Capacity

Establishing and maintaining a broad range of systems and resources, including skilled caregivers and dedicated facilities, to support emergency services and the treatment of injury and disease during non-disaster times, will greatly enhance the capacity for disaster management and response, and improve the ability of societies to address disaster-associated health and medical impacts.
