## VULNERABILITY (V)

AVERAGE MUNICIPAL INDEX SCORES

RANK: 6 / 33 DEPARTMENTS ASSESSED

AVERAGE SCORE: 0.566

### KEY FACTORS INFLUENCING VULNERABILITY

#### Housing Vulnerability

Populations living in poorly constructed housing, or homes built prior to the enactment of modern building codes, are more susceptible to structural damage and losses due to hazard impacts. In addition, higher density living situations such as crowded households increase susceptibility to negative consequences resulting from hazard exposure.

#### Clean Water Access Vulnerability

Those without easy or adequate access to water distribution and containment systems face significant demands on daily routines that effectively limit their response and recovery capacity and the ability to maintain livelihoods. Increasing access to improved water and sanitation improves health outcomes and frees up resources to decrease further susceptibility to impacts.

## COPING CAPACITY (CC)

AVERAGE MUNICIPAL INDEX SCORES

RANK: 30 / 33 DEPARTMENTS ASSESSED  
AVERAGE SCORE: 0.347

### KEY FACTORS INFLUENCING COPING CAPACITY

#### Energy and Communications Capacity

Homes, businesses, industry, and government all rely on access to energy resources and communications for continuity of daily activities. Expanding, strengthening, and securing the energy network and increasing the availability of internet services will contribute to economic development, facilitate effective and coordinated communication, and increase the speed of recovery processes in the aftermath of a disaster.

#### Governance

The stability and effectiveness of institutional structures, trust in government, and enforcement of laws to prevent and control crime and violence is an indication of a government's ability to successfully mitigate and cope with hazards. Instability of institutional structures can make a municipality more susceptible to the negative effects of a disaster event.

## RESILIENCE (R)

**RANK: 28 / 33 DEPARTMENTS ASSESSED**

**AVERAGE SCORE: 0.390**

The Resilience score and ranking represent a combination of Very High Vulnerability and Very Low Coping Capacity. Key drivers of Resilience across municipalities within Guaviare are summarized below. Detailed municipal-level results for the RVA are available in DisasterAWARE.
