

DISASTERAWARE PRO®Landslide Operations Checklist

Make better decisions, faster.

DISASTERAWARE PRO **Landslide Operations Checklist**

Hazards can occur anywhere, and at anytime, requiring fast and effective decision making to protect lives and livelihoods. This procedural checklist is designed to assist emergency and disaster management practitioners in utilizing PDC's DisasterAWARE Pro system to plan for and respond to landslide hazard events. It provides guidance on how to use DisasterAWARE early warning and anticipatory insights to ensure effective actions are taken and how to use the system to know where a hazard is likely to occur, who will be impacted, the extent and severity of impacts, and what can be done to save lives and property.

Before using this checklist, make sure you meet the following prerequisites:

You are an emergency / disaster management practitioner.

This checklist is designed for emergency and disaster management practitioners who support emergency operations centers.

You have registered for a DisasterAWARE Pro user account.

In order to make use of this checklist you must have an active Disaster-AWARE Pro user account. To register, visit https://disasteraware.pdc.org and create an account.

You have completed all DisasterAWARE tutorials and set up your Smart Alert notifications.

To understand where to access key DisasterAWARE features and functions referenced in this checklist, complete the online courses titled DisasterAWARE: An Introduction and Enhance Your Landslide Early Warning, Monitoring, and Response, available here: pdc.org/help

Disaster response support:

response@pdc.org

Global landslide alerts are provided through an innovative partnership between PDC and <u>NASA's Earth Applied Sciences Disasters</u> program area. NASA's Landslide Hazard Assessment for Situational Awareness model (LHASA) has been integrated into PDC's ready-made, "Early Warning for All" and Risk Intelligence solution, DisasterAWARE. This includes automated landslide exposure reporting through PDC's Event Brief.

ALERT AND NOTIFICATION - NEW LANDSLIDE HAZARD IDENTIFIED

T = Time of Event

Position Responsible = To be assigned by agency

Time Ela (Minutes T1+ 0:00		New landslide hazard / threat identified: DisasterAWARE SmartAlert sends an alert/notification for a new landslide hazard in the designated area of responsibility (AOR), or it is identified by the emergency management organization's DisasterAWARE Pro monitoring activities. If there is knowledge of a hazard from another source and it is not shown in DisasterAWARE, contact response@pdc.org to have it added.	Position(s) Responsible
Action	Time Elapsed (Minutes)	Description	Position(s) Responsible
1	T+ 0:05	Determine hazard severity (WARNING/WATCH/INFORMATION) in DisasterAWARE (disasteraware.pdc.org) via the landslide hazard icon color on the map: Note: Landslides hazards were developed in partnership with NASA and are predictive. Warning (Red): Conditions are right for a landslide to occur and may impact populations and infrastructure. There is a high likelihood that action will need to be taken. Watch (Yellow): Conditions are favorable for a landslide to occur and may impact populations and infrastructure. Monitor closely and be prepared to act if necessary. Information (Blue): A significant landslide has recently occurred with severe impacts on population or infrastructure. Agencies are responding. No additional threat is anticipated.

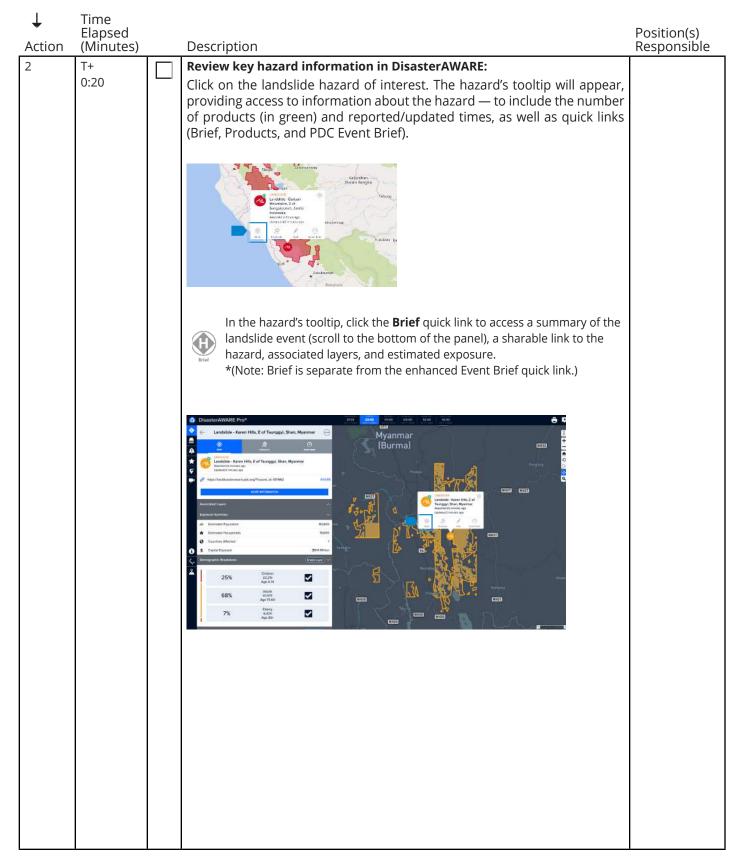

Continued... ALERT AND NOTIFICATION - NEW LANDSLIDE HAZARD IDENTIFIED

T = Time of Event		Position Responsible = To be assigned by agency		
↓ Action	Time Elapsed (Minutes)	Description	Position(s) Responsible	
6	T+	Hazard monitoring:		
		 Continue to monitor hazard impacts in AOR using DisasterAWARE Pro's automated updates, including alert level changes, Event Brief anticipated impact reports, and potential resource requirements needed for response operations. 		
		 Use information in Situational Awareness (SA) products as needed. Continue to update Senior Leadership as required. If authorized, upload situational awareness products as updates occur.³ 		
		 Continue monitoring until the hazard expires in DisasterAWARE Pro or monitoring is no longer required. 		
7	T+	Supervisory oversight:		
		 Ensure checklist tasks have been completed or are in progress as appropriate. Ensure daily operations event log is up to date with all: Hazard and weather-related information received. Notifications and reports to Senior Leadership as required. Continue until hazard expires in DisasterAWARE Pro or monitoring is no longer required. 		

³Approved organizations only. For more information or to request a product be uploaded, contact response@pdc.org.

HAZARD REQUIRES EMERGENCY RESPONSE ACTIVATION

T = Time of Event

Position Responsible = To be assigned by agency

Time Elapsed (Minutes)			Trigger / Activity	Position(s) Responsible
T2+ 0:00			Hazard severity reaches need for Emergency Response Operation: Senior Leadership activates Emergency Response Operations as provided for by the emergency management organization's SOP.	
Action	Time Elapsed (Minutes)		Description	Position(s) Responsible
8	T+ 10:00		 Prepare initial incident brief: Review Event Brief updates and hazard layers to include in initial incident briefing materials. 	
9	T+ 20:00		 Conduct initial incident briefing: Provide initial incident brief to Incident Command/Senior Leadership. 	
10	T+ 		 Monitor/gather data/report/keep records: Continue to monitor hazard in DisasterAWARE Pro for automatic updates, impacts in AOR, and potential resource requirements needed for response operations under changing conditions. Use information in SA products and briefings for Incident Command, Senior Leadership, the Media, etc. as needed. If authorized, upload situational awareness products as updates occur.² Continue for duration of incident. 	
11	T+ 		 Incident timeline oversight: Ensure checklist tasks have been completed or are in progress as appropriate. Ensure organization records and DisasterAWARE Pro Hazard product file (as appropriate) are up to date with: Hazard and weather-related information received. SA products issued. Briefings for Incident Command/Senior Leadership as provided for by emergency management organization's SOP. Continue for duration of incident.
